I would like to offer my most sincere thanks for the work done by TTR Data Recovery. I tried a few programs on hand to recover data on an SSD hard drive, that typically work. Unfortunately, none of them did. After a brief search on Google, I found your company, with many positive reviews. Since it would cost me nothing, if the data could not be recovered, I figured it was worth a shot.

After a few emails back and forth with TTR, we sent the hard drive, free shipping was provided. Numerous emails followed, as the team kept me fully up to date on what was going on. It turned out there was some mechanical issues inside the drive they needed to fix first, then successfully located the data on the drive. After sending us the folders and file structure they found, we confirmed it was the data we needed. A few emails later, the data was scheduled to be recovered.

I'm happy to say, the customer service was excellent and all of my data has been recovered. I can't thank your company enough and will recommend everyone to you. Please forward this to your team and thank them for a job well done.

Sincerely,

Steve Noah
